

# INSECTS

## Cantrall's bog beetle (*Liodessus cantralli*)

**DISTRIBUTION & ABUNDANCE:** State listed as special concern. The status of this species is uncertain in Michigan. It is uncommon at best and is probably critically imperiled.

**ASSOCIATED LANDSCAPE FEATURES:** ponds; banks: clay; bog; fen; inland emergent wetland

**ASSOCIATED THREATS:** Lack of life history knowledge; unknown

**COMMENTS:** Need surveys to assess abundance and distribution; need basic life history information; need to identify threats.
