

SNAILS

cross vertigo

(*Vertigo modesta*)

DISTRIBUTION & ABUNDANCE: State listed as special concern. This species is known from only two locations in the Upper Peninsula. These represent the only known populations for the species in the eastern U.S. It is considered critically imperiled in Michigan.

ASSOCIATED LANDSCAPE FEATURES: rock/cliff/ledge

ASSOCIATED THREATS: lack of scientific knowledge; unknown

COMMENTS: Need additional surveys to assess abundance and distribution; need basic life history information; need to identify threats.
