RELEASE OF TAX REVERTED PROPERTIES

*The Michigan Department of Environmental Quality (DEQ) has determined that this property is designated as either or both a critical dune area under Part 353, Sand Dune Protection and Management, or a high risk erosion area under Part 323, Shorelands Protection and Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. This property has not been inspected to determine whether it contains buildable area. Under Part 353, construction of any building, septic system, well, road, any grading, filling, or excavating, and any developmental, silvicultural, or recreational activity that significantly alters the physical characteristic of a critical dune is prohibited without a permit from the DEQ. Under Part 323, a permit must be obtained prior to construction of any building or installation of a septic system on a designated property.

This restriction has been placed on the deed by the State of Michigan and is enforceable against the Grantee, their future assigns, heirs, and successors. The State of Michigan reserves the right for authorized officials to enter upon the described property at reasonable times to inspect the premises in order to assure compliance with this deed
