

# Compartment Review Presentation

Baraga Forest Management Unit

Compartment 11005

Entry Year: 2027

Acreage: 2,132

County: Baraga

Management Area: Keweenaw Bay

---

**Stand Examiner:** Jason Mittlestat

**Legal Description:**

T50N R34W, Section 1, 2, 11, 12, 16, 22T51N R33W Section 27

**Identified Planning Goals:**

Maintain or expand mesic conifers, protect water quality, and maintain the aspen type.

**Soil and topography:**

The topography is a mix of fairly level land interspersed with drainages and in some cases some very steep slopes. Soils are Rubicon sands; Rubicon-Rousseau-Ocqueoc complex; Rousseau-Ocqueoc fine sands; Carbondale and Tacoosh mucks.

**Ownership Patterns, Development, and Land Use in and Around the Compartment:**

The compartment is fragmented. Surrounding ownership is a mix of forest industry and small private landowners. Use on the south is generally for forest management.

**Unique Natural Features:**

Red-disked alpine, Wood turtle, Bald eagle, Henry's elfin have been documented in the compartment. Potential for osprey, eagle, great blue heron rookery, red-shouldered hawk, moose, and gray wolf.

**Archeological, Historical, and Cultural Features:**

**Special Management Designations or Considerations:**

The former L'Anse Township landfill is in section 12. DEQ has restrictions on this site that would affect future operations.

**Watershed and Fisheries Considerations:**

This compartment contains Menge Creek, Six Mile Creek, Nesters Creek, and Hazel Creek and their tributaries. No specific comments other than follow BMP's

**Wildlife Habitat Considerations:**

Regenerate mature aspen stands; they will be 60-64 years old during the year of entry. Retain hemlock and oak. Mark trees growing under and around oaks so as to release oak crowns and to stimulate oak reproduction.

**Mineral Resource and Development Concerns and/or Restrictions**

The nearest active sand & gravel mining operation is approximately one mile away, in Sec 9. There may be some potential for sand & gravel within the compartment on uplands. Potential for metallic and critical minerals in this area is not well known. There has been limited documented mineral exploration or detailed mapping in this vicinity. Any potential metallic minerals would likely occur at significant depth. Potential for any metallic mineral discoveries within the compartment is considered low. No active State metallic mineral leases or lease nominations occur within two miles. There is no potential for economic oil and gas production in the UP. The State does not own all the mineral rights within the compartment. Because the mineral estate is the dominant estate, reasonable access to the surface must be provided to private owners if they choose to explore or develop their mineral rights.

**Vehicle Access:**

Much of the compartment is accessed by logging roads off of county roads. DNR has easements that assure access to much of the land. Not all of the access is good. There are steep slopes, and swamps that limit where access can take place.

**Survey Needs:**

Survey will be needed for timber harvest activities.

**Recreational Facilities and Opportunities:**

There are two snowmobile trails, trail 15 and trail 159 that cross parts of this compartment.

**Fire Protection:**

This is not a fire prone area. There are areas of extreme topography throughout the compartment.

**Additional Compartment Information:**

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

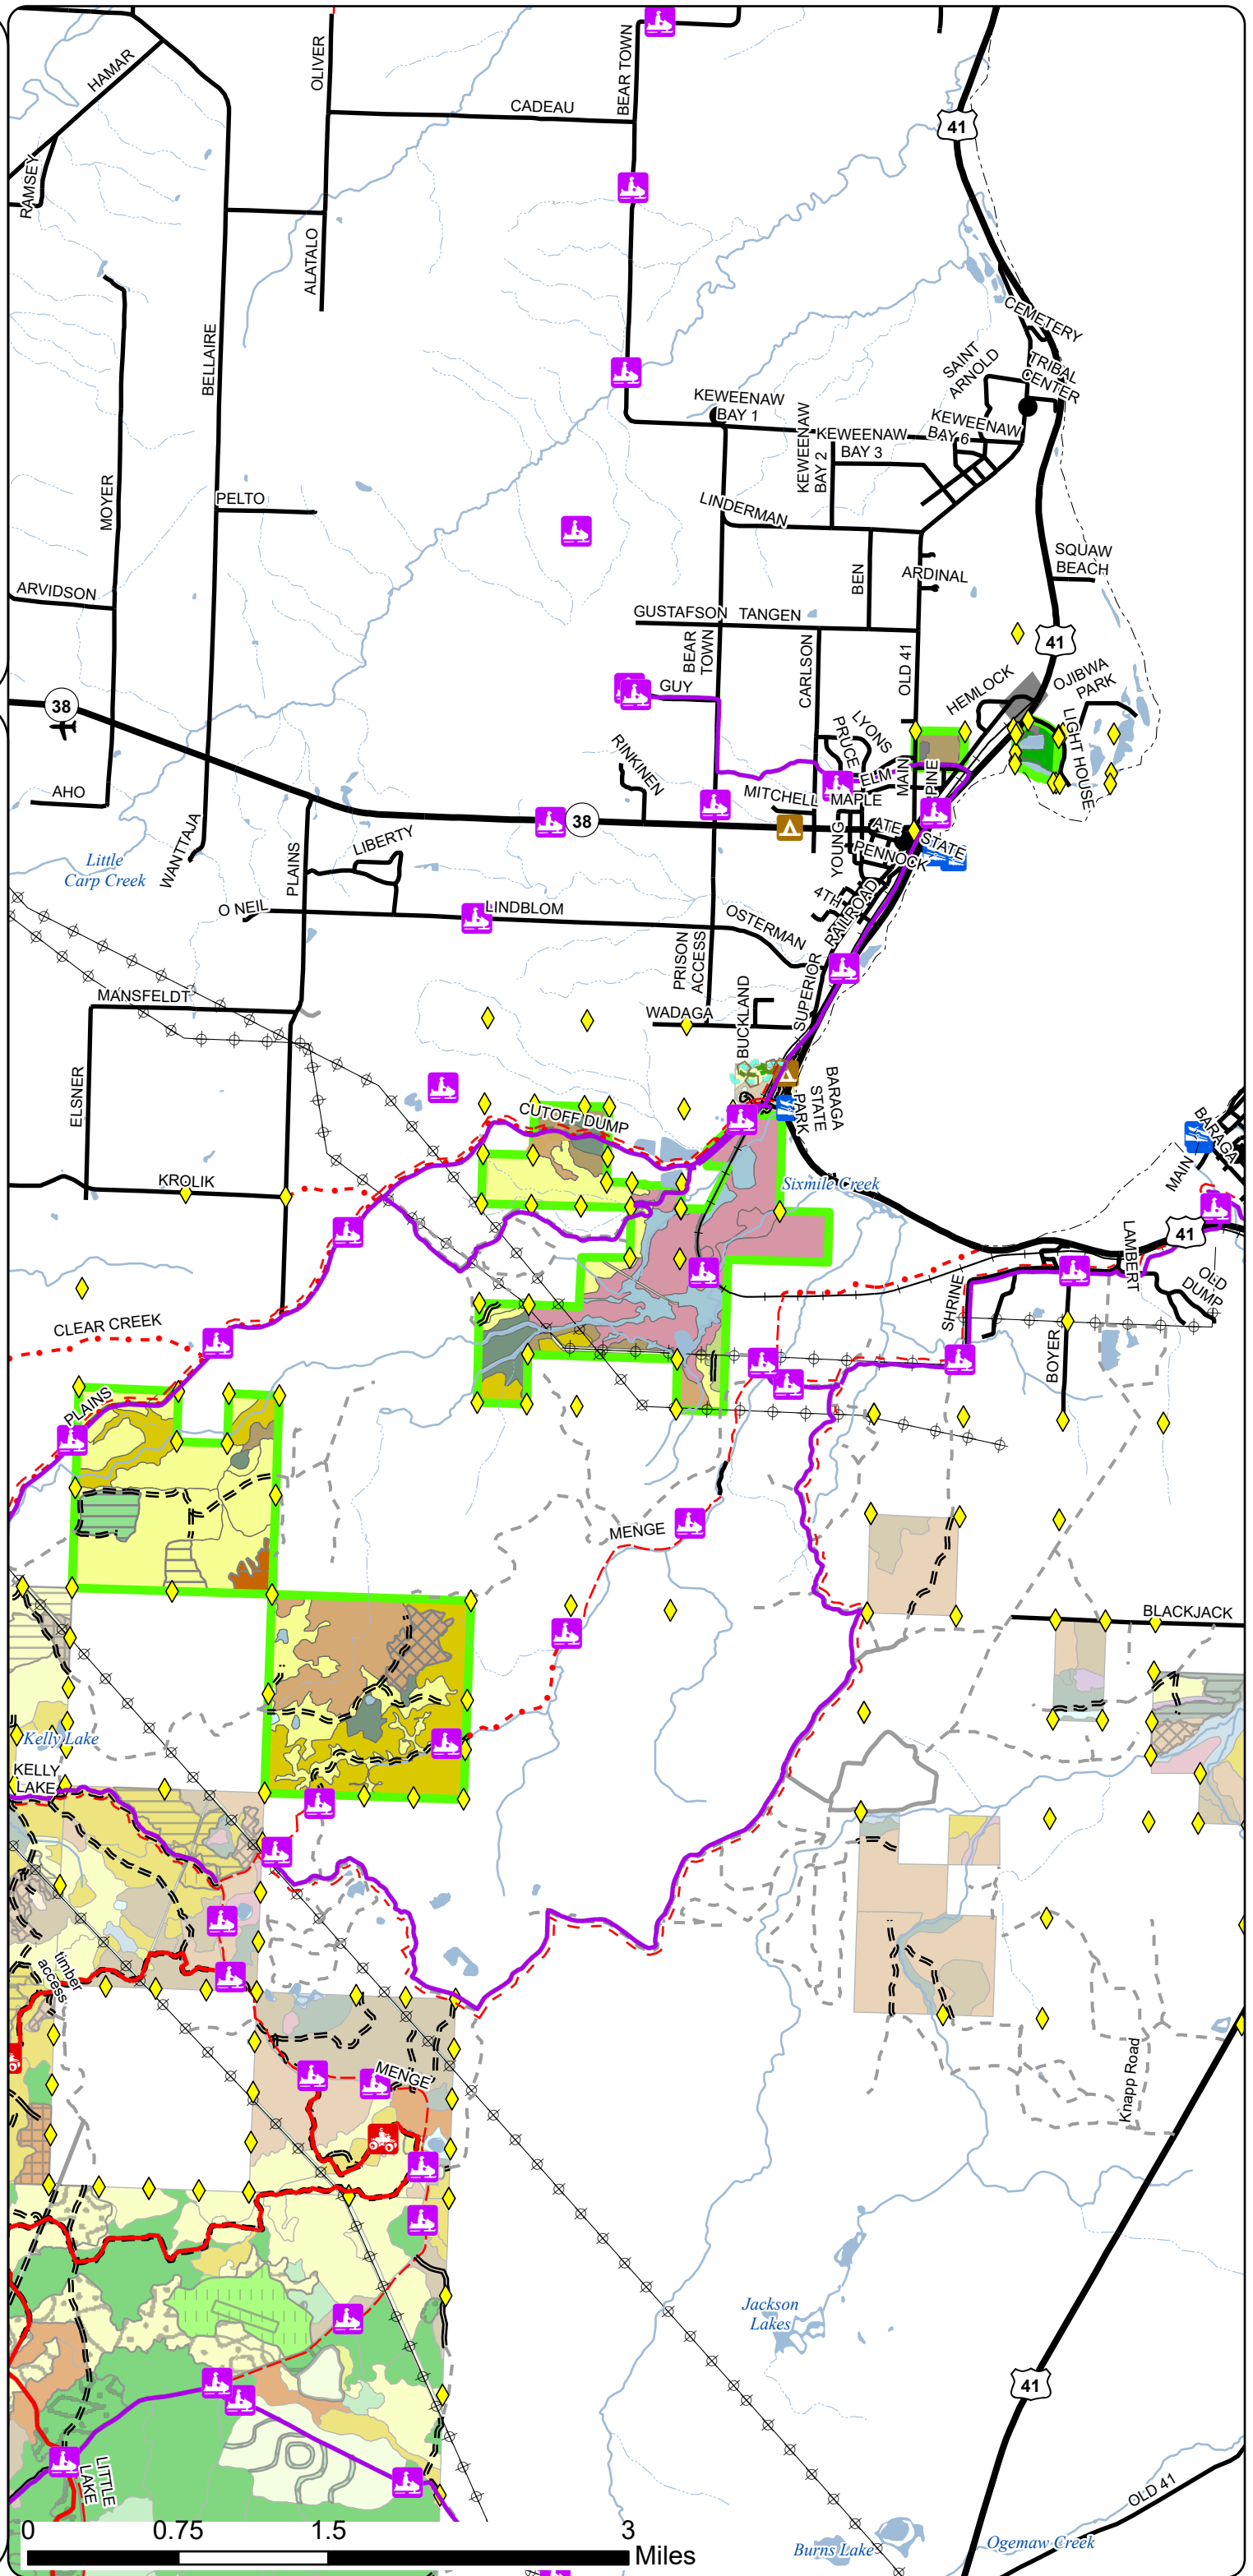

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**
