Stand Boundary

Objective: Planted red pine with natural regeneration of northern hardwoods and oak being acceptable as well.

Methods: Trench then plant to red pine. Planting spacing will be 9 feet between seedlings. Standard row width. Push trench line all the way to treatment edges.

Location: Otsego County, T32N R02W, Section 7

Comments: Clearcut in the winter of 2025-26 (Storey Time Pine, #53-005-21). Chipping requirement was waived due to significant ice storm damage. Some areas of heavy slash accumulation although most was spread out adequately. Most stumps are low but a few high ones may be present. Terrain is flat. A few scattered oak leave trees are present, mostly at the north and southwest ends. A few clumps of red pine regeneration were left uncut near the roads, these can be avoided during trenching.

Recreation: No
Fisheries: No
Wildlife/MNFI: No
Archaeology: No
