Page 41 of 41

AVERAGE STUMPAGE PRICE REPORT

01/01/2002 to 12/31/2002

1. Average Price is the one-year average of bid prices at the time of appraisal.
2. Price Used is the minimum acceptable advertised bid price.
3. Price Used % is the ratio of Price Used to Average Price.
4. Price Bid is the average price bid for the period.
5. % Change is the ratio of the difference between Price Bid and Average Price to the Average Price.
6. In general, the Baraga Forest Management Unit (FMU) uses the Scribner Decimal C log rule with a 7.6" top diameter inside bark (DIB).
In general, the Crystal Falls FMU uses the International ¼" log rule with a 9.6" top DIB.
In general, the rest of the Upper Peninsula (UP) uses the Scribner Decimal C log rule with a 9.6" top DIB.
In general, the Northern Lower Peninsula (NLP) uses the International ¼" log rule with a 7.6" top DIB.

All prices are weighted by volume.

Prices and volumes are only reported for bid species and products. "No-bid" species and products are not included. "No-bid" species and products are those that are included on the bid form and the contract, but the price is set with no opportunity to bid. This is used for species and products that are minor components of the sale.

Prices and volumes are only reported for advertised sales. Unadvertised sales, e.g. direct sales, negotiated sales, small receipt sales, firewood permits, etc., are not included.

This report is based on the contract issue date, which is often the same as the bid date, but not always.

Volumes and values are only totaled when comparable units exist. For example, there is no Statewide totals, except for # OF BID ITEMS, because cruising specifications and log rules are different between Region I - Upper Peninsula and Region II - Northern Lower Peninsula.
