

Compartment Review Presentation

Crystal Falls Forest Management Unit

Compartment 12168

Entry Year 2028

Acreage: 2,276

County: Iron

Management Area: Brule River

Stand Examiner: Eric Brolin

Legal Description:

T42N R31W section 12 and 13

Identified Planning Goals:

Optimize sustainable timber production while enhancing and protecting wildlife habitat. Continue to sustainably balance the aspen age class acres. Protect any riparian areas and transition zones during management activity.

Soil and topography:

Very fine sandy loams throughout. There is a very small conifer swamp pocket with muck soils.

Ownership Patterns, Development, and Land Use in and Around the Compartment:

Industrial forest ownership is on three sides of the compartment. Non industrial private lands are on the east. Active forest management is occurring throughout the area.

Unique Natural Features:

None identified

Archeological, Historical, and Cultural Features:

None recorded

Special Management Designations or Considerations:

The very northern edge of the compartment lies within a deer wintering complex.

Watershed and Fisheries Considerations:

This compartment contains Camp Six Creek, Erickson Lake, Emerson Lake, and two unnamed streams that serve as tributaries to the Michigamme River. Camp Six Creek is a designated Type 1 trout stream less than 50 feet wide and has a predicted mean July water temperature of 63°F (cold stream). For areas susceptible to Aspen regeneration, a 300-foot riparian management zone is recommended for Camp Six Creek. For the unnamed tributaries and for areas not susceptible to Aspen regeneration, a minimum 100-foot riparian management zone is recommended to protect riparian areas in accordance with best management practices. Erickson Lake (35-acres) and Miller Lake (15-acres) are natural inland lakes. A minimum 100-foot riparian management zone is recommended for these waterbodies to protect inland lake resources in accordance with Best Management Practices.

Wildlife Habitat Considerations:

This compartment is comprised of aspen of various age classes and is primarily used by featured species including ruffed grouse, American woodcock, deer and bear. This compartment is part of the historic Camp 5 Deer Wintering Complex. This area is currently providing winter cover for deer. Mast, when produced by the scattered oak and cherry, benefits deer, bear, grouse and squirrels. West Camp 5 Hunter Walking Trail will be maintained for deer, bear, and grouse.

Mineral Resource and Development Concerns and/or Restrictions

An active sand & gravel mining operation is adjacent to the compartment, in Sec 1. It is highly likely there is additional sand & gravel within the compartment on the uplands. Considerable exploration for iron ore, diamonds, and perhaps other minerals has occurred in the area within and around the compartment, but no deposits of economic significance were documented. There is no current metallic mineral leasing activity involving State-owned mineral rights in the area. There is no potential for economic oil and gas production in the UP.

Vehicle Access:

Good to fair. The Camp 5 Road runs through the middle of the compartment. Access off of that is somewhat limited with unimproved grass two track roads.

Survey Needs:

N 1/16 sec 11, 12

Recreational Facilities and Opportunities:

None

Fire Protection:

Fuel types consist mainly of aspen. There would be few problems in controlling a fire in this area. Low to moderate intensity ground fire would be expected. Some distance may be required to find a water source.

Additional Compartment Information:

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class
- Cover Type by Harvest Method
- Proposed Treatments – No Limiting Factors
- Proposed Treatments – With Limiting Factors
- Stand Details (Forested and Nonforested)
- Dedicated and Proposed Special Conservation Areas
- Site Condition Details

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers
- Proposed treatments
- Site condition boundaries
- Details on the road access system

The main map displays the land cover and treatments for Compartiment 12168. The map is divided into several sections, each with a unique color and pattern. The legend on the left identifies the symbols used for various features, including roads, streams, and land cover types. The map shows a network of roads, including a paved road (thick black line) and several gravel and dirt roads (dashed lines). Streams and lakes are shown in blue, and water bodies are labeled. The land cover is represented by different colors and patterns, indicating various forest types and treatments. The map is labeled with various numbers and letters, such as 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

A horizontal scale bar with a black outline. It is divided into four equal segments by three vertical tick marks. The first segment is solid black, the second is white, the third is solid black, and the fourth is white. Above the bar, the numbers '0', '0.5', and '1' are placed at the first, second, and third tick marks respectively. To the right of the bar, the word 'Miles' is written.

Site No.	Dominant Site Cond	Availability	Dominant Site Condition	Acres	Other Site Condition	Other Site Condition	Other Site Condition	Other Site Condition
1	Available		5C: Delay treatment for age/size class diversity or exceptional site quality	41	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Manage half and hold half of Stand 19 to create more aspen age class diversity on a larger acreage stand. S/SE area of Stand 19 decreases significantly in diameter as elevation lowers towards lowland stands. Hold until next YOY to allow more diameter growth.								

Report 4 – Site Conditions

2	Available	5C: Delay treatment for age/size class diversity or exceptional site quality	137	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Delay treatment until 2038 YOY to create aspen age class diversity in the area.							
3	Unavailable	5E: Long-Term Retention	7	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Long term retention for adjacent stands. Approximate tree length buffer to around openings to discourage aspen regeneration into the wildlife openings.							
4	Unavailable	5E: Long-Term Retention	1	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Long term retention for Stand 9.							
5	Available	5C: Delay treatment for age/size class diversity or exceptional site quality	38	Unspecified	Unspecified	Unspecified	Unspecified
Comments: EXTENDED ASPEN ROTATION. Delay treatment until 2048 YOY to increase aspen age class diversity in the area. Areas contain natural pine understory component that may become better established with aspen canopy cover and create more future species diversity.							
6	Unavailable	5E: Long-Term Retention	8	2G: Too wet (sensitive soils, does not include access issues)	Unspecified	Unspecified	Unspecified
Comments: Long term retention for harvest area, Stand 6. Retention includes vernal areas with a 100' buffer, and scattered interior patches dense to conifer and/or large oak with a mix of aspen.							
7	Unavailable	5E: Long-Term Retention	8	2F: Too steep	Unspecified	Unspecified	Unspecified
Comments: Long term retention for Stand 73. Area is surrounded by steep rock outcrops. Area contains mature aspen and pine.							

Report 4 – Site Conditions

8	Unavailable	5E: Long-Term Retention	1	2G: Too wet (sensitive soils, does not include access issues)	Unspecified	Unspecified	Unspecified
Comments: Long term retention for Stand 81. Contains low ground with edges that represent current species overstory.							
9	Unavailable	5E: Long-Term Retention	6	2G: Too wet (sensitive soils, does not include access issues)	Unspecified	Unspecified	Unspecified
Comments: Long term retention for Stand 78. Includes a low depression across the stand that contains softer soil and a tamarack patch, no running or standing water areas. Exclude with an approximate tree length buffer to avoid soil damage and/or water quality issues. Also includes strips along the south to act as a 100' buffer for the unnamed waterway/stream.							
10	Unavailable	5E: Long-Term Retention	6	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Long term retention for adjacent anticipated harvest area in YOE 2038. Vernal depressions with 100' buffer. These still need to be considered and buffered appropriately for adjacent proposed harvest for YOE 2028.							
11	Available	5C: Delay treatment for age/size class diversity or exceptional site quality	61	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Large acreage aspen stand was broken up to create more aspen age class diversity in the area. These areas contain some smaller average diameter than the proposed harvested areas of the stand. They also contain a more dense pine understory. Reevaluate YOE 2038 for management.							
12	Available	5B: Maintain for regeneration purposes	6	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Area of extremely dense white pine advanced regeneration, average 2" - 4" diameter. Exclude from management and protects this YOE 2028. Reevaluate next YOE for possible management.							

Report 4 – Site Conditions

13	Unavailable	3J: Water quality/BMPs (stream, river, or lake)	5	Unspecified	Unspecified	Unspecified	Unspecified
Comments: 100' buffer along lowland bog area.							
14	Available	5C: Delay treatment for age/size class diversity or exceptional site quality	61	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Half of a large acreage aspen stand. Broken up to create aspen age class diversity in the area. This area contains slightly smaller diameter trees and dense red maple advanced regen in the understory that may become more merchantable next YOE.							
15	Unavailable	5E: Long-Term Retention	3	3J: Water quality/BMPs (stream, river, or lake)	Unspecified	Unspecified	Unspecified
Comments: Long term retention for Stand 72. 100' buffer along flooded lowland area along the north edge.							
16	Available	5C: Delay treatment for age/size class diversity or exceptional site quality	12	Unspecified	Unspecified	Unspecified	Unspecified
Comments: Stand should hold well until next YOE. I would be best managed with the adjacent aspen to the west in the future for access while avoiding operating in the planted pine to the east.							
17	Unavailable	5E: Long-Term Retention	2	2G: Too wet (sensitive soils, does not include access issues)	Unspecified	Unspecified	Unspecified
Comments: Saturated ground excluded from past harvest. Long term retention for Stand 20.

72	4130 - Aspen	Poletimber Well	111.2	46	81-110	N/A	Aspen poles, moderate site quality at best. Patches of mature mixed pine in areas. Scattered conifer saplings in the understory with some patches containing more dense white pine advanced regen. The S/SE area has a very dense understory of well established red maple saplings. A bit larger aspen diameter in the north half of the stand. The far north tip contains some steep rock outcrops that may have to be excluded from future harvest.

Stand	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	Managed Site	General Comments		
78	4130 - Aspen	Poletimber Well	144.5	46	81-110	N/A	Eastern 40 acres is 5 years older and shows a bit larger diameter. Aspen diameter ranges across the stand from 6" to 11"+, overall average is about 8" diameter. Some vernal pond areas in the central portion. Some areas have a fairly open understory but overall VERY stocked with white pine saplings in the understory. Some areas are extremely thick with white pine saplings. White pine saplings are well established and average 2" - 4" diameter.

79	42290 - Natural Mixed Pine	Sawtimber Well	29.3	103	141-170	N/A	Natural pine stand with a lot of large diameter trees. Evenly dispersed white pine but overall heavier to red pine. Some small openings in the east half contained fir that is declining/dead and growing in with some pine and aspen saplings. Other small patches and veins across the stand contain some small pole size aspen with a fair amount considered to be merchantable understory trees. Mixed pine saplings are fairly abundant in areas. This stand has noticeably more red pine saplings than any surrounding aspen understories. BA varies quite a bit across the stand, anywhere from 100-120 to 200+ (especially in the NW section).
